Captain's Corner**By Ted Klosowski****January**

2024 is going to be a good year! We have been having lots of fun with our Star Trek group and have lots of fun activities! It is always fun getting together to see a movie, go to the planetarium, visit some caves, go kayaking or just going out to eat. One thing that is neat is how Star Trek has brought together such a diverse group of people that I am proud to call friends! While I don't know what 2024 has in store, I know it is going to be fun!

It is time for the Region 1 Awards. They have many awards we can submit for but the main one we always send in is for newsletter of the year. We have had several good ones but please review and let me know your favorite. Submissions need to be in by the end of January so please let me know ASAP!

Finally, it is time to clean up our email list. We currently have 27 people on our email list and we want to make sure everyone receiving our emails still wishes to continue receiving them. I will be sending an email out to everyone on the list. To stay on the list simply reply back. You can also reply back as CC, BCC or newsletter only to change your current email status. Thanks, and looking forward to seeing you at our next meeting!

We hope to see you at our next meeting on Thursday, February 1, 6:30 pm at Charlie's and on Zoom!

This STARFLEET REGION ONE CERTIFICATE OF APPRECIATION

Is Given Unto the Officers and Crew of the

USS TYCHO

For your continual and exemplary support during the year 2023 to STARFLEET Region One, it's Officers, members, projects and programs. Your active participation demonstrates the best ideals and traditions of "STAR TREK" and Region One. Region One can only become even greater with your continual positive support. We wish you much success in your endeavors in the coming year and many great adventures as you go forth to promote Trek fandom.

2023

I Wonder

By Belinda Williams

*Oh how I wonder
Of this broiling bliss asunder
How I wonder
At nightfall's darkening
Of that insistent harkening
Thy shine cometh hither
Touching me
Thy golden blessings ever be
How I wonder
O thy brandished radiance
Diminish not thy salience
As a gentle wish of warming mist
And then a subtle kiss
That becometh bliss
And thusly, I shall not resist
How I wonder
Even within this enlightenment*

I do blunder

*Yet, thou still arises so faithful and true
Announcing joy and hope anew
With molten horizons
Whatever thy plasma apprises
How I wonder
Of thy affection from a distance
Be thou my warming caress
Assuring my grateful existence*

A Tycho Story

By AI

Story 12 <https://writerhand.com/tools/ai-story-generator>

USS Tycho was tasked with an unusual mission: to time travel. As they set out to explore the possibilities of going back and forth in time, they had no idea what they were getting into.

The crew of the USS Tycho had been specifically chosen for their expertise in the field of science and engineering: Ted, the Captain; Marchelle, the First Officer; Brian, the Computer Management Specialist; Linda, the Stellar Cartographer; Chrissy, the Disaster Recovery and Helm Officer; Justin, the Chaplain and Anthropologist; Jeremy, the Engineering Assistant; Ryan, the Biology Expert; Sherryl, the Lab Manager; Troy, the Shuttle Bay Technician; Lisa, the Archaeologist; Wynnie, the Communications and Interpreter; Donna-Marie, the Chief Medical Officer; Paula, the Helm and Navigation Officer; Belinda, the Head Nurse; Sherreea, the Chief Communications Officer; Carolyn, the Nurse; Diana, the Chief Science Officer; Jerry, the Chief Engineering Officer; Guy, the Ambassador; and Dianne, the Damage Control and Operations Officer.

They set off to explore the past with the technology the USS Tycho was equipped with. They soon realized they would have to be careful, as a single mistake could have catastrophic consequences on the timeline.

The first stop was the year 1776, where the USS Tycho observed the Battle of Trenton. By traveling to this point in time, they learned how significant the events on that day were to

the future of the United States.

Next, they went back even further to Ancient Rome, where they observed Julius Caesar ascending to power. Through this mission, they discovered the intricacies of the Roman Republic and its legal system.

After that, they approached the Dark Ages, where they observed the eruption of Mount Vesuvius and its subsequent consequences for the people and the area near Pompeii. Through that, they gained a better understanding of the past and the dangers that come with the negligence of modern societies.

The next mission brought them to the industrial age, where they witnessed the expansion of the railroad system and the transformation of manufacturing. Through their observation of the railroads, they were able to better appreciate the importance of the industrial revolution on modern society.

Finally, the mission ended in the year 2125, where they observed the first landing on Mars. Even though there were some difficulties, they were nonetheless able to witness the marvel of human space exploration.

Once their mission was completed, the USS Tycho and its crew returned to the present day with a newfound appreciation of history. They also recognized the lessons they had gained while putting their own lives at risk in the course of their travels. In the end, the USS Tycho and its crew had a successful mission and were honored for their bravery and accomplishments in time travel.

A Tycho Story

By AI

Story 13 <https://toolbaz.com/writer/ai-story-generator>

USS Tycho set out on what seemed like an ordinary mission. Little did the crew know, they would soon be facing an intergalactic adventure of epic proportions.

The Tycho had been commissioned to investigate a series of mysterious signals emanating from deep space. The crew was comprised of an eclectic mix of scientists, engineers, and technicians led by the resolute Captain Ted.

The team quickly began to separately and collectively explore the strange phenomena and mapped out a course toward the source. As the strange signals drew closer, the crew started to feel an unexplainable unease, a discomfort difficult to quantify.

When the crew finally reached their destination, they were confronted with an ancient ship of unknown purpose. Moments later, a transmission came through from an alien race that identified itself as part of a galactic alliance.

The aliens explained that their home planet was on the brink of destruction due to an inescapable asteroid that was on its way to collide with it. They asked the Tycho for help in evacuating as many of their people as possible.

Without hesitation, the Tycho and its crew accepted the almost-impossible task. Everyone pulled together and worked as one. The Captain and First Officer - Marchelle - devised a plan to use the Tycho's tractor beam to pull the alien ship to a safer distance while Brian and Linda worked their magic in the computer mainframes to calculate the intricate and delicate maneuvers necessary to achieve

this goal. Meanwhile, Chrissy handled the helm to seamlessly guide the ship while Justin, Jeremy and Ryan prepped and assembled a prototype spacecraft that could safely accommodate the alien passengers.

The Tycho's shuttle bay technicians, Troy and Lisa, worked tirelessly to fabricate the craft, frequently consulting the lab manager, Sherryl, and the onboard archaeologist - Lisa - to ensure structural integrity. Wynnne was tasked with the monumental job of translating the alien communications while Donna-marie nurses Paula, Belinda, and Karolyn took care of the health of the alien evacuees.

Finally, the moment arrived for the Tycho's crew to put their lives on the line and make the risky journey back to the alien planet. With everyone strategically positioned in their roles, the Tycho made its way back towards the asteroid and, in a miraculous feat, was successful in its mission.

The Tycho's Chief Science Officer - Diana - and Chief Engineer - Jerry - worked side by side to calculate the distance to reach the alien planet and their Chief Communications Officer - Sherriea - made a last brave call to the alien race to give them one final message of hope.

Meanwhile, the resident Ambassador - Guy - and the Damage Control Technician - Dianne - were behind the scenes lending their expertise. Finally, after a grueling escape that seemed to take forever, the Tycho had done the impossible and saved the lives of an entire alien race.

As the Tycho emerged from the depths of space, the brave crew were welcomed home as heroes. Ted, Marchelle and their crew were celebrated for a job well done and have gone down in history as an example of courage and perseverance.

Book Review

By Ted Klosowski

Galloping Around the Cosmos: Memories of TV's Wag-on Train to the Stars from Today's Grown-Up Kids

by Jim Beard

This was a fun and unusual book. Toledoan Jim Beard compiled this collection of stories from various authors, etc. asking them, "What does Star Trek (The Original Series) mean to you?" It was quite interesting to see how Star Trek influenced their lives.

I would, in turn, like to ask the same question of you? How did Star Trek influence your life? I would like to expand and include all the Star Trek series, or even the movies since we have a broad age range in our group. I wouldn't mind seeing this as a monthly feature as we all take our turns sharing about Star Trek!

I will start us off. Born in 1961 I have some vague memories of watching TOS in its original run. I was only 5 or 6 when its original run started. At that time, I was more interested in Lost in Space, Voyage to the Bottom of the Sea and other Irwin Allen TV Series. My first real memories of watching Star Trek was in syndication on channel 50 mostly at my uncle Dave's house. I have three cousins from my mom's sister Cioci Pat. The oldest, David, is a year or two younger followed by Doug and the youngest,

Denise. Since we were close in age, we hung out together quite a bit and one of the favorite things for me was watching Star Trek. Whatever we were doing when Star Trek was on, I would always stop to watch it and discuss what was happening with my uncle. It was at this time that I developed an appreciation for Scotty. He quickly became my favorite character as he was always able to get the ship going, often in the nick of time! While I didn't exactly choose my career path (it kind of just happened) I think it is why I am comfortable working with computers and writing the programs to control the plants and run the conveyors and machines.

51-55230

Oatmeal Crisp Dessert

Submitted by Wynifred McBeth

From Betty Crocker's Cookbook

Ingredients:

**4 cups sliced tart apples
(about 4 medium)

2/3 to 3/4 cup packed with
brown sugar

1/2 cup all-purpose flour (or
self-rising)

1/2 cup oats

1/3 cup margarine or butter, softened

3/4 teaspoon ground cinnamon

3/4 teaspoon ground nutmeg

**or 2 cans (17 oz ea) of apricots or 1 can (21 oz) Cherry
pie filling, or 1 can (29oz) canned peaches, or 2 cans
(13.5oz ea) of pineapple

Drain the cans of the juice. If the mixture needs moisture,
you can add the juice gradually. Lessen the sugar accord-
ingly.

If you use canned fruit or pie filling, use the lesser amount
of brown sugar. (Let's not go crazy on the sugar . . .)

Directions:

Heat oven to 375

Arrange fruit in greased square pan 8x8x2

Mix remaining ingredients, sprinkle over fruit

Bake until topping is golden brown and apples are ten-
der—about 30 minutes

Serve warm and if desired, add ice cream or vanilla yogurt

Cozy Winter White Bean Soup

Submitted by Donna-marie Mominee

Ingredients:

2 Tbsp olive oil

1 medium onion, diced (about
a cup)

2 stalks of celery, diced

3 (large) garlic cloves, minced

2 cans of white beans, drained
and lightly rinsed

2 medium potatoes, diced (about 2 cups)

2 large carrots, diced

1 tsp finely chopped parsley or 1/4 tsp dried parsley

1 tsp salt

1/2 tsp coarse pepper

6 cups of vegetable broth

1 cup of water

Possible salt and pepper to taste.

In a large soup pot, heat olive oil over medium heat. Add onion
and celery, cook until they are just starting to turn translucent.
Add garlic and cook until veggies are tender.

Add the potatoes, beans, carrots, salt, parsley, 6 cups of broth, 1
cup of water and bring to a boil. Reduce heat and simmer for
about an hour. If necessary, add more water, and salt and pep-
per to taste!

U.S.S. Tycho Minutes

USS Tycho

January 4, 2024

Presiding Officer: Ted Klosowski

Recording Officer: Marchelle Lee

Location: Charlie's on Central Ave. and Zoom

Attending: Diana, Jerry, Lisa, Linda, Dianne, Guy, Marchelle,
Wynnie, Ted, Sherriea, Belinda, and Justin

Happy 2024!

Brian is home sick. Assorted crew members have been sick recently.

Justin is now on the Region One Newsletter staff as well as the Communique staff. Congratulations!

Dues have been officially increased by \$5 per membership plan (not per person).

Region 1 awards submissions are coming up, please let Ted know which newsletter you think we should submit.

Working with AI program, but it only allows 50 words a day for free.

A group went to Paddy Jack's for dinner and then to Lourdes College Appold Planetarium for a show on the Christmas Star of Bethlehem. It was very interesting.

We will be going to Golden Lily for the January outing. More to come. On April 8 we will gather to watch the eclipse.

Justin – Looking for volunteers for Region 1 newsletter. Looking for new ideas. Thinking of doing it quarterly instead of bimonthly.

Sherriea experienced a scammer on Facebook.

Belinda is organizing poems into categories, and writes about 2 or 3 poems a month. Read a poem.

Guy – brother passed away in Florida. Held a memorial at a coffee shop. His brother didn't want any ceremonies. Spent Christmas with his son, who helped him rearrange things in his house.

Dianne – Solvent. Family Christmas is delayed, everyone was sick.

Wynnie made a new uniform top. It's nice and warm.

Lisa listens to audiobooks. They are available through Toledo Lucas County Public Library. Kate Mulgrew does a great job reading stories.

Chrissy has been busy with band practice. Also, there was a grant for equipment for high speed networking on amateur radio.

Diana hosted her family's Christmas at the Commons where her mother is. There were 16 people. Daughter was visiting and left the 26th. The Wolfs sang over the holidays. Jerry got sick, but did take two weeks of vacation. Diana was sick, too. Davis Besse ran all year in 2023 online.

January 13 is the newsletter deadline. February 1 is the next meeting date, meeting starts at 6:30 pm.

END TRANSMISSION

Next meeting is February 1, 2024***Charlie's @ 6:00 and Zoom @6:30******Be there or be a tribble.***

From the Chaplain

By Justin Hunt KGO

Amor Viniat Omni

Star Trek: Voyager is probably my least favorite series in the franchise. That is not to say that it is without its merits, and it is certainly in no way a reflection on those who love it. It is simply a matter of my preferences. However, with that having been said, I am currently doing a watch-through of the entire series. The episode that I recently finished is Season 2, Episode #19: "Lifesigns." Critics of Voyager often cite that there is very little character development, but this episode seems to go contrary to that stance in that the Doctor seems to make a huge leap forward.

The EMH turned CMO of the ship learned to love. This is no small feat considering his entire being is an elaborate computer program and his physical manifestation is nothing more than photons and forcefields. However, despite the obvious roadblocks to such developments, the adaptive nature of his programming managed to allow love to "conquer all," as the saying goes. This is a very meaningful development, not only for the character, whose newfound love allows him to start viewing patients as a whole person as opposed to machines to be fixed; but also, for me as a viewer.

I, as well as many others in the world, have some issues with connecting to others. It isn't just that we (myself and others with similar issues) aren't good with people, as many of us have developed adequate social skills, but that people can come and go in our lives without us really feeling it. A lot of the time, I find myself questioning just how real a given connection is for me or feeling like a fake friend. The fact that I'd give the shirt off my

back to help someone seems irrelevant to me compared to the fact that if that person leaves, I feel nothing. It's an odd sensation indeed to not mourn the loss of people in a way that the people around you deem appropriate. It makes one question the validity of the relationship, at least as far as their own part in it. It makes you ask, "Can I love?"

Watching this episode and seeing a program develop to the point of being able to reciprocate affection was, in a way, cathartic. I'm a happily married man. My wife, by the grace of God, has found a way to live with me these sixteen years. And, much like the Vidiian woman that came into the doctor's life, my wife had no intentions of ending up in that situation. In the case of the Vidiian, she was just a patient who was being tended to. The doctor wanted nothing more than to perform the duties he was programmed to do. Yet, somehow, something clicked. General concern and compassion (such as could be felt by a hologram) gave way to a real connection. A connection strong enough to let her go, even when she wanted to stay. A love strong enough to do what was best for the other person at the expense of oneself. In my case, I was content being just a friend until we became something more. Something broke through and allowed a deeper connection. It's part of why my wedding ring reads, "Amor Viniat Omni." Which, being translated from the 13th century (bad) Latin is, "Love Conquers All."

Seeing such a deep connection develop in the life of a projection that was never able or intended to feel love shows a possibility for all who struggle with connection. Not just romantically, but in the case of deep and meaningful friendships. In the form of true compassion and concern for our fellow travelers on this road. It is my sincere hope that we can all find ways for our programming to adapt and become better people.
